Since 1955 Wilden Pump & Engineering LLC, has been the global leader in air-operated double-diaphragm pumps (AODDP). Wilden is deeply committed to the pursuit of excellence, customer satisfaction, research & development and market knowledge. As a premier organization, Wilden has the infrastructure, knowledge base, and intellectual capital to exceed your expectations worldwide.

Our world-class distributor network ensures that you will have access to the latest pump technologies and fluid transfer services available. Wilden and its distributor network are devoted to your industries, applications and processes, servicing your needs with world-class products, delivery and best of class expertise. Put us to the test and contact your local distributor today at www.wildendistributor.com

**UNIQUE CHARACTERISTICS**
- Air operated pumps (non electrical)
- Superior flow rates and efficiency
- Superior product containment
- Bolted liquid paths
- Self priming
- Run-dry capable
- Anti-freezing technology
- Deadhead without damage
- Variable flow & pressure
- Intrinsically safe
- Lube-free operation
- On/Off reliability
- Large solids passage
- Ease of operation and maintenance

**APPLICATIONS**
- Solvents
- Acids
- Caustics
- High viscosity
- High pressure
- Large solids
- Abrasive media
- Hazardous & flammable liquids
- Clean-room fluids
Installation

VERSATILITY

SELF-PRIMING
Portable
High vacuum
Run-dry capable
No heat generation

POSITIVE SUCTION HEAD
Preferred installation for high viscosity applications
Superior product containment
Inlet pressure should be limited to 0.7 bar (10 psig) to maximize parts life

SUBMERGED
Air operated pumps (non electrical)
Submersible option required
Single-point exhaust options available
Multiple material options available for process fluid compatibility
APPLICATION FLEXIBILITY

Wilden’s fluid transfer solutions provide you a wide range of application possibilities for your pre-process, process and post process needs. This application map is a sample representation of the wide range capabilities of Wilden products.

Put us to the test today! Contact your authorized Wilden distributor at www.wildendistributor.com
The Pro-Flo X™ is the latest innovation to the AODD pump world. The Pro-Flo X™ air distribution system (ADS) is based on the patented Pro-Flo® ADS and offers operational flexibility never before seen. This flexibility comes from the patent pending Efficiency Management System (EMS™) which allows the user to optimize the Pro-Flo X™ ADS for any application demands or pump size.

Due to its ground-breaking design, the Pro-Flo X™ and EMS™ technology are simple and easy to use. The integrated control dial located at the top of the ADS allows users to easily select the flow rate that best suits the application. The results are higher performance, lower operational costs and performance flexibility that goes far beyond what was previously considered the industry standard.

The Pro-Flo X™ ADS makes previously restrictive rules for AODD pumps a reality. The Pro-Flo X™ ADS is dependable, energy efficient and excels in the harshest of conditions; put us to the test today.

The Rules Have Changed!

**MARKET POSITION**
- Variable control (Discharge flow rates & air consumption)
- Superior flow rate
- Superior anti-freezing
- Submersible options
- Lube-free operation
- ON/OFF reliability
- Most efficient (GPM/SCFM)
- ATEX models available

**FEATURES**
- EMS™ (Efficiency Management System)
- Metal center block
- Non-stalling unbalanced spool
- Simple and durable design

**APPLICATION TRAITS**
- Maximize performance and efficiency
- All metal construction
- Process applications
- Max. MTBR (Mean Time Between Repair)

**AVAILABILITY**
- 25 mm (1”)
- 38 mm (1-1/2”)
- 51 mm (2”)
- 76 mm (3”)

**STATE OF THE ART**
Air Distribution Systems

Innovation

2007

PROFLO

PROGRESSIVE PUMP TECHNOLOGY
MARKET POSITION

- Direct electrical interface
- Superior ON/OFF reliability
- Reduced systems costs
- Lube-free operation

APPLICATION TRAITS

- System automation
- 4-20 mA pH Adjusting
- Batching Applications
- OEM accounts

FEATURES

- Externally controlled
- Various voltage options
- Nema 4, Nema 7, or ATEX
- Simple installation

AVAILABILITY

- 6 mm (1/4”), 10 mm (3/8”), 13 mm (1/2”), 25 mm (1”), 38 mm (1-1/2”), 51 mm (2”), 76 mm (3”)

MARKET POSITION

- Anti-freezing
- ON/OFF reliability
- Longest-lasting wear parts
- Lube-free operation

APPLICATION TRAITS

- Max. MTBR (Mean Time Between Repair)

FEATURES

- Plastic center block*
- Non-stalling unbalanced spool
- Simple and durable design

AVAILABILITY

- 6 mm (1/4”), 10 mm (3/8”), 13 mm (1/2”), 25 mm (1”), 38 mm (1-1/2”), 51 mm (2”), 76 mm (3”)

MARKET POSITION

- Superior anti-freezing
- ON/OFF reliability
- Superior flow rate
- Lube-free operation

APPLICATION TRAITS

- Max. MTBR (Mean Time Between Repair)

FEATURES

- Metal center block
- Non-stalling unbalanced spool
- Simple and durable design

AVAILABILITY

- 38 mm (1-1/2”), 51 mm (2”), 76 mm (3”)

* 76 mm (3”) pump available with aluminum center block only
THERMOPLASTIC ELASTOMER (TPE)

• POLYURETHANE: An excellent general purpose diaphragm for use in non-aggressive applications. This material exhibits exceptional flex life and durability. Wilden’s most economical diaphragm.

• WIL-FLEX™: Made of Santoprene®, this diaphragm is an excellent choice as a low cost alternative to PTFE in many acidic and caustic applications such as sodium hydroxide, sulfuric or hydrochloric acids. Exhibits excellent abrasion resistance and durability at a cost comparable to neoprene.

• SANIFLEX™: Made of Hytrel™, this diaphragm exhibits excellent abrasion resistance, flex life and durability. This material is FDA approved for food processing applications. An outstanding general purpose diaphragm as well.

PTFE ELASTOMERS

• PTFE: Excellent choice when pumping highly aggressive fluids such as aromatic or chlorinated hydrocarbons, acids, caustics, ketones and acetates. Wilden’s PTFE diaphragms exhibit good flex life.

• Wilden also offers PTFE integral piston diaphragms that offer superior product containment. The smooth contoured shape makes this diaphragm an excellent choice for sanitary or ultra pure applications.

ULTRA-FLEX™ DIAPHRAGM TECHNOLOGY

• Guaranteed longer life - If longer life is not experienced, Wilden will send you a new set of Ultra-Flex™ diaphragms free of charge.

• Convolute shape, altered fabric placement, and unique hardware work together to decrease the unit loading on the diaphragm and distribute stress.

• MATERIAL OPTIONS: Neoprene, Buna-N, EPDM, Viton®
ELASTOMER TEMPERATURE LIMITS:

- **NEOPRENE**: -17.7°C to 93.3°C (0°F to 200°F)
- **BUNA-N**: -12.2°C to 82.2°C (10°F to 180°F)
- **EPDM**: -51.1°C to 137.8°C (-60°F to 280°F)
- **VITON®**: -40°C to 176.7°C (-40°F to 350°F)
- **WIL-FLEX™**: -40°C to 107.2°C (-40°F to 225°F)
- **SANIFLEX™**: -28.9°C to 104.4°C (-20°F to 220°F)
- **POLYURETHANE**: -12.2°C to 65.6°C (10°F to 150°F)
- **PTFE**: 4.4°C to 104.4°C (40°F to 220°F)

RUBBER ELASTOMERS

- **NEOPRENE**: An excellent general purpose diaphragm for use in non-aggressive applications such as water-based slurries, well water or sea water. Exhibits excellent flex life and low cost.

- **BUNA-N**: Excellent for applications involving petroleum/oil-based fluids such as leaded gasolines, fuel oils, hydraulic oils, kerosene, turpentines and motor oils.

- **EPDM**: Excellent for use in applications requiring extremely cold temperatures. May also be used as a low cost alternative for pumping dilute acids or caustics.

- **VITON®**: Excellent for use in applications requiring extremely hot temperatures. May also be used in aggressive fluids such as aromatic or chlorinated hydrocarbons and highly aggressive acids. PTFE would normally be used with these aggressive fluids as its flex life is better than Viton®. However, in applications involving suction lift outside the range of PTFE, Viton® will be the preferred choice for highly aggressive fluids.

Please verify the chemical resistance capabilities and temperature limitations of elastomers and all other pump components prior to pump installation. Wilden publication PUG II (Pump Users Guide II) and the Online Chemical guide should be consulted for specifics. Go to www.wildenchemicalguide.com for your Wilden Chemical Compatibility Chart.
As the global leader in AODD bolted pumps, Wilden has the largest material offering in the industry. The Advanced™ Series metal and plastic bolted pumps offered by Wilden are specifically designed for maximum performance, efficiency, and containment. The bolted configuration ensures total product containment while the liquid path reduces internal friction to maximize output and efficiency. Multiple elastomer options are available to meet and exceed your abrasion, temperature, and chemical compatibility challenges.

Advanced™ Series pumps are offered in aluminum, stainless steel, alloy C, polypropylene, PVDF and PFA. A variety of connection options and specialized air distribution systems are also available for your specific application needs.

**OUR SOLUTIONS**

**ADVANCED™ SERIES PUMPS**
- Higher flow rates
- Variable flow & pressure
- Shear sensitive
- Intrinsically safe
- Dry-run capable
- Portable & submersible
- Large solids passage
- High suction lift

**SUPERIOR CONTAINMENT**
- Leak-free operation
- Superior torque retention
- Unique valve seat design
- Superior finish on sealing surfaces
- Multiple liquid connections available

**ENHANCED EFFICIENCIES**
- Pro-Flo™ X, Pro-Flo™ V, Pro-Flo®, Accu-Flo™
- Anti-Freezing ADS
- Greater flow per SCFM input
- Low cost of ownership
- Ease of operation & maintenance

**SUCCESS**
- Achieve higher yields
- Increased pump output
- Increased On/Off reliability
- Reduced turbulence
- Reduced internal friction

**CONTAINMENT ENSURED**
- Leak-free pump operation
- Viscous & non-viscous product transfer
- Largest chemical compatibilities
- Transfer with confidence

**COST EFFICIENT**
- Optimized applications
- Reduced air consumption
- Reduced kilowatt usage
- Longest MTBR (Mean Time Between Repair)
- Lower operational costs & downtime
- Saves you money
TECH DATA

- Sizes: 6mm (1/4") through 76mm (3”)
- Materials: Aluminum, Ductile Iron, Stainless Steel, Alloy C
- Elastomer Temperatures: Up to 176.7°C (350°F)
- Elastomers: Buna-N, Neoprene, EPDM, Viton®, Wil-Flex™, Saniflex™, Polyurethane, PTFE

PERFORMANCE DATA

- Max flow rates: 1021 lpm (270 gpm)
- Max suction lift: 9.5 m (31.2’) Wet, 7.6 m (25.0’), Dry
- Max Disp. per stroke: 6.09 l (1.61 gal)
- Max discharge pressure: 220.6 bar (3200 psig)
- Max size solids: 76 mm (3”)

FEATURES

- ADS: Pro-Flo®, Pro-FloV™, Pro-FloX™, Accu-Flo™
- All metal bolted construction
- Higher flow rates
- Superior containment
- Anti-Freezing technology
- Portable & Submersible
- BSPT (NPT) or DIN (ANSI) liquid connections available
- Lube-free operation

FEATURES & BENEFITS
• Reduce pipe vibration and shaking
• Protects in-line equipment
• Reduces water hammer
• Absorbs acceleration head
• Lower system maintenance cost
• Suction stabilizer
• Prevent leaking at pipe fittings and joints
• Extend and improve pump performance
• Avoid damaging pressure surges
• Wide range of material and elastomer options
• Common parts with Wilden pumps
• Self adjusts to system pressure

SD Equalizers® reduce pressure fluctuation inherent in positive displacement pumps

AVAILABLE SIZES
• 13 mm (1/2”)
• 25 mm (1”)
• 38 mm (1-1/2”)
• 51 mm (2”)

MATERIAL OF CONSTRUCTION

WETTED HOUSING
• Aluminum
• 316 Stainless Steel
• Ductile Iron
• Polypropylene
• PVDF

AIR DISTRIBUTION SYSTEM
• Aluminum
• 316 Stainless Steel
• PTFE Coated Ductile Iron
• Polypropylene
• Glass filled Polypropylene
• Mild Steel PTFE Coated

CERTIFICATIONS: COMING SOON
LEAK DETECTION
- Detects diaphragm failure at the source: The PTFE primary diaphragm
- Sensors are located between the primary and back-up (containment) diaphragms
- When the sensors detect a conductive liquid, an audible alarm, LED, and an internal latching relay are activated
- Increase containment, reduce fugitive emissions, and reduce down time with 24-hour pump surveillance
- Power Requirement: 110V AC, 220V AC or 9V DC Battery

PUMP CYCLE MONITOR
- The PCMI counts pump cycles by sensing the presence of the air valve spool (Pro-Flo™).
- The Sensor, located at the air valve end cap, detects the presence of a magnet located at the end of the air valve piston/spool.
- The PCMI unit registers a complete pump cycle when the piston/spool shifts away from the sensor and subsequently returns to the original position.
- The PCMI unit has a reset switch located on the face of the PCMI module
- PCMI also has the ability to be reset from a remote location.

DRUM UNLOADING
DRUM & TOTE UNLOADING
- Universal kit for 6 mm (1/4"), 13mm (1/2") pumps
- Fits 51 mm (2") NPT bungholes
- Tube length can be cut to length
- Variety of materials are available
THINGS TO THINK ABOUT WHEN SELECTING AN AIR-OPERATED DOUBLE-DIAPHRAGM PUMP (AODDP)

<table>
<thead>
<tr>
<th>APPLICATION</th>
</tr>
